PROFESSIONAL SUMMARY

Senior DevOps & Cloud Engineer with 11+ years of experience designing, implementing, and managing enterprise-scale cloud infrastructure, Kubernetes platforms, and DevOps automation across AWS and Azure. Expertise in Infrastructure as Code (Terraform, CloudFormation), CI/CD (Jenkins, GitHub Actions, CloudBees), containerization (Docker, Kubernetes), configuration management (Ansible, Ansible Tower), GitOps (Argo CD), Platform Engineering, DevSecOps, and cloud automation.

CORE COMPETENCIES

- **CI/CD & Build Tools:** Jenkins and GitHub Actions
- **Version Control:** Git, Github, Gitlab
- **Containers & Orchestration:** Docker, Kubernetes, AWS EKS, Helm, Service Mesh (Consul)
- **Infrastructure as Code (IaC):** Terraform, AWS CloudFormation
- **Configuration Management:** Ansible, Ansible Tower (AWX)
- **Cloud Platforms:** AWS (Core & DevOps native services), Azure
- **Scripting & Programming:** Bash, PowerShell, Python, Node.js, Groovy, YAML
- **Artifacts & Quality:** Nexus, JFrog, SonarQube
- **Monitoring & Tools:** Prometheus, Grafana, AWS CloudWatch
- **GitOps:** ArgoCD, Helm

EXPERIENCE

Ernst & Young (EY) - GDS India

Sr. DevOps Engineer

July 2022 – Present

Kolkata, India

- Designed and implemented a scalable **data ingestion framework** using **Azure Databricks Auto Loader** to ingest structured and semi-structured data from cloud storage into Delta Lake with incremental processing.
- Implemented **Mem0-based long-term memory** for AI agents by integrating vector storage on AWS, enabling persistent contextual memory across user interactions.
- Integrated vector storage with Large Language Models (LLMs) to improve response relevance and enable personalized user experiences
- Designed and implemented enterprise-grade **CI/CD pipelines** using **CloudBees Jenkins** to automate build, testing, security checks, and deployment workflows across multiple AWS environments.
- Built Infrastructure as Code (IaC) automation using **Terraform** and **Scalr**, enabling standardized, repeatable, and policy-governed infrastructure provisioning.
- Developed reusable Terraform modules and pipeline templates to improve deployment consistency, reduce manual effort, and accelerate infrastructure delivery.
- Authored developer guides and operational documentation to improve platform adoption.

Amazon Web Services (AWS)

Cloud Engineer

October 2021 – July 2022

Hyderabad, India

- Specialized in AWS-native DevOps services, including CodeCommit, CodeBuild, CodeArtifact, CodeDeploy, and CodePipeline, to design and maintain scalable CI/CD workflows.
- Built and managed end-to-end CI/CD pipelines using AWS CodePipeline, integrating CloudFormation, Elastic Beanstalk, and Amazon ECS for automated build, test, and deployment processes.
- Deployed and managed highly available web and microservices applications on AWS Elastic Beanstalk for Node.js, Java, Python, Ruby, and Docker workloads.
- Leveraged AWS CloudWatch, CloudTrail, CodeBuild logs, and ELB logs to troubleshoot deployment failures, perform root cause analysis (RCA), and improve release reliability.
- Designed, tested, and automated AWS CloudFormation templates to provision scalable, repeatable, and secure cloud infrastructure solutions for enterprise customers.
- Collaborated with development, QA, and operations teams to streamline deployment workflows, enhance infrastructure automation, and support Agile release management practices.

Amdocs

DevOps / SRE Engineer

May 2020 – September 2021

Pune, India

- Designed and implemented enterprise-grade **CI/CD pipelines** using **Jenkins, GitHub Actions, and Ansible**, automating application build, testing, deployment, and server restart processes across Development, UAT, and Production environments, significantly reducing manual effort and deployment time.
- Developed reusable **Ansible Playbooks, Roles, and Ansible Tower (AWX)** job templates to automate application deployments, configuration management, log rotation, patching, and operational tasks across Linux-based environments, improving infrastructure consistency and reliability.
- Managed and optimized highly available **Jenkins** infrastructure, administering distributed build agents, pipeline libraries, plugins, security, and environment-specific configurations to support multiple enterprise applications.
- Built and maintained **Docker** containerized application deployment workflows and collaborated with development teams to migrate applications towards **Kubernetes**, improving deployment consistency and application scalability.
- Automated cloud infrastructure provisioning using **Terraform** and AWS services, enabling Infrastructure as Code (IaC), repeatable deployments, environment standardization, and improved change management practices.
- Collaborated with cross-functional Development, QA, Infrastructure, and Release Management teams within Agile/Scrum environments to deliver frequent, reliable software releases while maintaining platform stability and compliance.

Cognizant

Sr. Infra Developer

August 2019 – May 2020

Pune, India

- Wrote automation scripts using Groovy and PowerShell for Build, Unit Testing, Code Coverage, and automated packaging within Jenkins.
- Created Jenkins Multi-Branch pipelines with advanced Groovy scripting to automate peer code reviews, Nexus artifact uploading, and multi-environment staging.

- Developed CloudFormation templates for deterministic, multi-zone infrastructure provisioning on AWS.
- Configured application setups under Windows IIS, including application pool tuning and website creation managed programmatically via Chef Cookbooks.
- Successfully migrated over 114 code components into Bitbucket and established unified CI/CD pipelines.

Tata Consultancy Services (TCS)
System Engineer

June 2015 – August 2019
Pune, India

- Created and scheduled weekly archival database jobs to optimize capacity and minimize critical application outages.
- Optimized production server health and operating system performance using automated log rotation and file cleanup automation.
- Monitored production infrastructure and configured automated real-time alert definitions using AWS CloudWatch.
- Developed a custom PowerShell utility to broadcast automated maintenance and system outage alerts to business users and corporate stakeholders.
- Handled core Linux system administration tasks including troubleshooting high memory allocation, disk usage constraints, and CPU utilization bottlenecks.

CERTIFICATIONS & AWARDS

Certifications

- GitHub Copilot (GH-300)
- GitHub Actions (GH-200)
- AWS Certified DevOps Engineer – Professional
- AWS Certified Solutions Architect – Associate
- HashiCorp Terraform Associate
- Microsoft Azure Fundamentals (AZ-900)

Recognition

- Exceptional Client Service Award – Recognized for consistent performance and strong technical delivery for a banking client project.
- Spot Award – Awarded for critical production delivery and exemplary work ethics during a major release phase.

EDUCATION

B. Tech in Computer Science & Engineering - Gandhi Institute of Engineering & Technology (Odisha)	2011 – 2015
Intermediate (Class XII) — KMPM Inter College, Jamshedpur	2011
Matriculation (Class X) — Loyola School, Jamshedpur	2009
